How to Find Chemical Information: A Guide for Practicing Chemists, Educators, and Students

Robert E. Maizell

How to Find Chemical Information: A Guide for Practicing Chemists, Educators, and Students Robert E. Maizell

"Highly recommended for anyone in chemistry looking for a very readable book on chemical information retrieval." -Journal of the American Chemical Society (on the Second Edition)

The Essential Guide to Using Chemical Information Sources-in a brand-new Third Edition

More chemical information resources exist now than ever before, in an array of formats that can be daunting to novices and experts alike in every discipline of the field. Yet a sound working knowledge of available sources and how to access them is an invaluable asset to anyone working in the fast-moving world of modern chemistry-an essential tool for saving time, money, and effort.

This new edition of *How to Find Chemical Information* guides readers skillfully through today's complex maze of chemical information sources and systems, whether in electronic or printed form. It combines an in-depth examination of chemical information tools and access methods with tested principles for assessing and selecting the most appropriate sources for different needs. Thoroughly revised and updated to address all major developments and trends of recent years, *How to Find Chemical Information, Third Edition* is a peerless resource that features:

- * The mechanics of chemistry information flow, communication patterns, and search strategies
- * Detailed and up-to-date material on Chemical Abstracts Service and its products
- * Other private and government chemical information sources
- * Online databases, host systems, Internet files, CD-ROMs, and other electronic products and how these fit into the total information picture
- * Encyclopedias, other major reference books, and reviews
- * Journals and patent documents
- * Coverage of safety, the environment, and related topics
- * Chemical marketing and business resources
- * Physical property data, process information, and more

From reader reviews:

Jason Urso:

Hey guys, do you would like to finds a new book to study? May be the book with the title How to Find Chemical Information: A Guide for Practicing Chemists, Educators, and Students suitable to you? The particular book was written by popular writer in this era. The book untitled How to Find Chemical Information: A Guide for Practicing Chemists, Educators, and Students is one of several books that everyone read now. That book was inspired many people in the world. When you read this guide you will enter the new way of measuring that you ever know ahead of. The author explained their strategy in the simple way, and so all of people can easily to recognise the core of this book. This book will give you a wide range of information about this world now. So you can see the represented of the world in this particular book.

Jacqueline Bull:

Are you kind of busy person, only have 10 or perhaps 15 minute in your moment to upgrading your mind proficiency or thinking skill possibly analytical thinking? Then you are experiencing problem with the book than can satisfy your small amount of time to read it because all of this time you only find e-book that need more time to be examine. How to Find Chemical Information: A Guide for Practicing Chemists, Educators, and Students can be your answer since it can be read by anyone who have those short free time problems.

Gerri Townsend:

A lot of reserve has printed but it differs. You can get it by world wide web on social media. You can choose the most effective book for you, science, comedian, novel, or whatever by simply searching from it. It is called of book How to Find Chemical Information: A Guide for Practicing Chemists, Educators, and Students. You can contribute your knowledge by it. Without leaving behind the printed book, it might add your knowledge and make you actually happier to read. It is most significant that, you must aware about reserve. It can bring you from one destination for a other place.

Tina Wilson:

Many people said that they feel bored stiff when they reading a e-book. They are directly felt this when they get a half portions of the book. You can choose often the book How to Find Chemical Information: A Guide for Practicing Chemists, Educators, and Students to make your own personal reading is interesting. Your skill of reading expertise is developing when you similar to reading. Try to choose easy book to make you enjoy to study it and mingle the sensation about book and examining especially. It is to be very first opinion for you to like to wide open a book and learn it. Beside that the reserve How to Find Chemical Information: A Guide for Practicing Chemists, Educators, and Students can to be your friend when you're truly feel alone and confuse using what must you're doing of their time.
