## **Lecture Notes on Principles of Plasma Processing** Francis F. Chen, Jane P. Chang

Plasma processing of semiconductors is an interdisciplinary field requiring knowledge of both plasma physics and chemical engineering. The two authors are experts in each of these fields, and their collaboration results in the merging of these fields with a common terminology. Basic plasma concepts are introduced painlessly to those who have studied undergraduate electromagnetics but have had no previous exposure to plasmas. Unnecessarily detailed derivations are omitted; yet the reader is led to understand in some depth those concepts, such as the structure of sheaths, that are important in the design and operation of plasma processing reactors. Physicists not accustomed to low-temperature plasmas are introduced to chemical kinetics, surface science, and molecular spectroscopy. The material has been condensed to suit a nine-week graduate course, but it is sufficient to bring the reader up to date on current problems such as copper interconnects, low-k and high-k dielectrics, and oxide damage. Students will appreciate the web-style layout with ample color illustrations opposite the text, with ample room for notes.

This short book is ideal for new workers in the semiconductor industry who want to be brought up to speed with minimum effort. It is also suitable for Chemical Engineering students studying plasma processing of materials; Engineers, physicists, and technicians entering the semiconductor industry who want a quick overview of the use of plasmas in the industry.

### **From reader reviews:**

#### **James Fletcher:**

This Lecture Notes on Principles of Plasma Processing are usually reliable for you who want to be described as a successful person, why. The main reason of this Lecture Notes on Principles of Plasma Processing can be one of several great books you must have will be giving you more than just simple examining food but feed you with information that perhaps will shock your preceding knowledge. This book is usually handy, you can bring it just about everywhere and whenever your conditions in e-book and printed kinds. Beside that this Lecture Notes on Principles of Plasma Processing forcing you to have an enormous of experience such as rich vocabulary, giving you trial of critical thinking that we all know it useful in your day exercise. So , let's have it and luxuriate in reading.

#### **Barry Phelan:**

Beside this specific Lecture Notes on Principles of Plasma Processing in your phone, it could possibly give you a way to get closer to the new knowledge or facts. The information and the knowledge you can got here is fresh from oven so don't end up being worry if you feel like an previous people live in narrow small town. It is good thing to have Lecture Notes on Principles of Plasma Processing because this book offers to your account readable information. Do you often have book but you don't get what it's all about. Oh come on, that wil happen if you have this in your hand. The Enjoyable option here cannot be questionable, including treasuring beautiful island. Use you still want to miss the item? Find this book along with read it from right now!

#### **Linda Gabriel:**

This Lecture Notes on Principles of Plasma Processing is fresh way for you who has fascination to look for some information given it relief your hunger associated with. Getting deeper you onto it getting knowledge more you know otherwise you who still having bit of digest in reading this Lecture Notes on Principles of Plasma Processing can be the light food for yourself because the information inside that book is easy to get through anyone. These books create itself in the form which can be reachable by anyone, yep I mean in the e-book application form. People who think that in book form make them feel tired even dizzy this e-book is the answer. So you cannot find any in reading a guide especially this one. You can find actually looking for. It should be here for a person. So , don't miss it! Just read this e-book type for your better life and knowledge.

#### **Agatha Roughton:**

Many people said that they feel bored when they reading a book. They are directly felt the idea when they get a half portions of the book. You can choose often the book Lecture Notes on Principles of Plasma Processing to make your current reading is interesting. Your personal skill of reading talent is developing when you such as reading. Try to choose simple book to make you enjoy to learn it and mingle the sensation

about book and reading through especially. It is to be initial opinion for you to like to open a book and learn it. Beside that the book Lecture Notes on Principles of Plasma Processing can to be your friend when you're feel alone and confuse in doing what must you're doing of the time.
