Staphylococcus Aureus: Molecular and Clinical Aspects (Infectious Disease & Microbiology) D A Aldeen, K Hiramatsu

Staphylococcus aureus is resident in skin and nasal membranes with a formidable pathogenic potential to cause a variety of community and hospital acquired infections. This authoritative survey covers the impact of genome sequences into our understanding of MRSA and MSSA pathogenesis. World specialists from America, Germany, Japan, Sweden and the UK contribute knowledge and experience which will be welcome to researchers, practitioners and postgraduate students of immunology, microbiology, bacteriology and pharmacology worldwide.

- An authoritative survey that covers the impact of genome sequences into the understanding of MRSA and MSSA pathogenesis
