Embedded SoPC Design with Nios II Processor and VHDL Examples Pong P. Chu

The book is divided into four major parts. Part I covers HDL constructs and synthesis of basic digital circuits. Part II provides an overview of embedded software development with the emphasis on low-level I/O access and drivers. Part III demonstrates the design and development of hardware and software for several complex I/O peripherals, including PS2 keyboard and mouse, a graphic video controller, an audio codec, and an SD (secure digital) card. Part IV provides three case studies of the integration of hardware accelerators, including a custom GCD (greatest common divisor) circuit, a Mandelbrot set fractal circuit, and an audio synthesizer based on DDFS (direct digital frequency synthesis) methodology.

The book utilizes FPGA devices, Nios II soft-core processor, and development platform from Altera Co., which is one of the two main FPGA manufactures. Altera has a generous university program that provides free software and discounted prototyping boards for educational institutions (details at <http://www.altera.com/university>). The two main educational prototyping boards are known as DE1 (\$99) and DE2 (\$269). All experiments can be implemented and tested with these boards. A board combined with this book becomes a “turn-key” solution for the SoPC design experiments and projects. Most HDL and C codes in the book are device independent and can be adapted by other prototyping boards as long as a board has similar I/O configuration.

From reader reviews:

Erich Arnold:

Book is written, printed, or created for everything. You can realize everything you want by a e-book. Book has a different type. To be sure that book is important thing to bring us around the world. Alongside that you can your reading proficiency was fluently. A book Embedded SoPC Design with Nios II Processor and VHDL Examples will make you to possibly be smarter. You can feel much more confidence if you can know about every thing. But some of you think in which open or reading some sort of book make you bored. It is not necessarily make you fun. Why they may be thought like that? Have you looking for best book or suited book with you?

Carla Ramirez:

The book Embedded SoPC Design with Nios II Processor and VHDL Examples will bring someone to the new experience of reading a book. The author style to clarify the idea is very unique. If you try to find new book to learn, this book very appropriate to you. The book Embedded SoPC Design with Nios II Processor and VHDL Examples is much recommended to you you just read. You can also get the e-book through the official web site, so you can easier to read the book.

Wanda Pence:

The book untitled Embedded SoPC Design with Nios II Processor and VHDL Examples contain a lot of information on that. The writer explains the girl idea with easy approach. The language is very simple to implement all the people, so do not necessarily worry, you can easy to read the item. The book was written by famous author. The author gives you in the new period of literary works. It is possible to read this book because you can please read on your smart phone, or model, so you can read the book inside anywhere and anytime. In a situation you wish to purchase the e-book, you can open up their official web-site along with order it. Have a nice learn.

David Myers:

Book is one of source of information. We can add our information from it. Not only for students but in addition native or citizen require book to know the up-date information of year to help year. As we know those ebooks have many advantages. Beside all of us add our knowledge, can also bring us to around the world. With the book Embedded SoPC Design with Nios II Processor and VHDL Examples we can take more advantage. Don't someone to be creative people? For being creative person must choose to read a book. Only choose the best book that suitable with your aim. Don't end up being doubt to change your life with that book Embedded SoPC Design with Nios II Processor and VHDL Examples. You can more appealing than now.
