Python Passive Network Mapping: P2NMAP Chet Hosmer

Python Passive Network Mapping: P2NMAP is the first book to reveal a revolutionary and open source method for exposing nefarious network activity.

The "Heartbleed" vulnerability has revealed significant weaknesses within enterprise environments related to the lack of a definitive mapping of network assets. In *Python Passive Network Mapping*, Chet Hosmer shows you how to effectively and definitively passively map networks. Active or probing methods to network mapping have traditionally been used, but they have many drawbacks - they can disrupt operations, crash systems, and - most importantly - miss critical nefarious activity. You require an accurate picture of the environments you protect and operate in order to rapidly investigate, mitigate, and then recover from these new attack vectors. This book gives you a deep understanding of new innovations to passive network mapping, while delivering open source Python-based tools that can be put into practice immediately.

Python Passive Network Mapping is for practitioners, forensic investigators, IT teams, and individuals who work together when performing incident response and investigating potential damage, or are examining the impacts of new malware threats. Those defending critical infrastructures will have a special interest in this book, as active or probing methods of network mapping are rarely used within these environments as any resulting impacts can be disastrous. *Python Passive Network Mapping* is ideally suited for use as a text in a variety of academic programs to expose and engage students in the art of passively mapping enterprise networks, with the added benefit of providing exposure to open source Python solutions.

- First book to show you how to use open source Python to conduct passive network mapping
- Provides a new method for conducting incident response and investigating the extent of potential damage to your systems
- Python code forensics toolkit for network mapping included on the companion website

From reader reviews:

Joe Vizcarra:

Why don't make it to become your habit? Right now, try to ready your time to do the important action, like looking for your favorite reserve and reading a reserve. Beside you can solve your trouble; you can add your knowledge by the guide entitled Python Passive Network Mapping: P2NMAP. Try to stumble through book Python Passive Network Mapping: P2NMAP as your pal. It means that it can to become your friend when you truly feel alone and beside associated with course make you smarter than before. Yeah, it is very fortuned to suit your needs. The book makes you considerably more confidence because you can know every thing by the book. So , we need to make new experience along with knowledge with this book.

Joel Jones:

The book Python Passive Network Mapping: P2NMAP can give more knowledge and information about everything you want. So why must we leave a good thing like a book Python Passive Network Mapping: P2NMAP? A few of you have a different opinion about book. But one aim that will book can give many details for us. It is absolutely appropriate. Right now, try to closer with the book. Knowledge or information that you take for that, you may give for each other; you may share all of these. Book Python Passive Network Mapping: P2NMAP has simple shape but you know: it has great and large function for you. You can appear the enormous world by open up and read a reserve. So it is very wonderful.

Brenda Seddon:

Book is to be different for each and every grade. Book for children until eventually adult are different content. As we know that book is very important normally. The book Python Passive Network Mapping: P2NMAP had been making you to know about other understanding and of course you can take more information. It is quite advantages for you. The guide Python Passive Network Mapping: P2NMAP is not only giving you a lot more new information but also to be your friend when you truly feel bored. You can spend your spend time to read your reserve. Try to make relationship while using book Python Passive Network Mapping: P2NMAP. You never sense lose out for everything if you read some books.

Al Fraire:

In this 21st century, people become competitive in every single way. By being competitive today, people have do something to make these survives, being in the middle of often the crowded place and notice simply by surrounding. One thing that often many people have underestimated it for a while is reading. Yeah, by reading a reserve your ability to survive boost then having chance to stand up than other is high. To suit your needs who want to start reading any book, we give you this kind of Python Passive Network Mapping: P2NMAP book as nice and daily reading guide. Why, because this book is greater than just a book.
