Perspectives on Ecclesiology and Ethnography (Studies in Ecclesiology and Ethnography)

Within the disciplines of religious studies, systematic theology, and practical theology there exists a divide between empirical and theological analyses of the church. Each volume in the cross-disciplinary series Studies in Ecclesiology and Ethnography attempts to address this gap by exploring the methodological and substantive issues that arise from both theological and empirical studies of the church's practices and social reality.

Perspectives on Ecclesiology and Ethnography, the inaugural volume in the series, proposes that if theology is to regain its relevance to the church today, theologians must utilize ethnographical tools in order to provide more accurate, disciplined research that is situated in real contexts. Using "ethnography" in its broadest sense -- encompassing any form of qualitative research -- this volume proposes that the church is both theological and social/cultural, which implies the need for a methodological shift for researchers in theology. Contributions from twelve scholar-practitioners lead the way forward.
