You can never stop them. You can only hope to control them.

Mice.

They are everywhere, and they are forever. They may be cute furry little creatures, but they excel at destruction, defecation, urination, and disease. They repopulate at alarming rates and will challenge you in controlling their numbers.

This book collects the widest selection of methods to get rid of mice either through lethal or non-lethal means.

Once you have the current population under control, its time to implement some preventive measures. You can find those here as well. If you've done the job well in fighting back the hordes of mice, and taken the proper steps to defend your castle you should not see another mouse. But, there's no guarantee. Mice being what they are, will find a way in again. It's your responsibility to keep the perimeter safe and secure at all times.

Good luck, and may you be ever vigilant in your patrols.
