Information and Communications Security: 12th International Conference, ICICS 2010, Barcelona, Spain, December 15-17, 2010 Proceedings (Lecture Notes in Computer Science / Security and Cryptology)

Information and Communications Security: 12th International Conference, ICICS 2010, Barcelona, Spain, December 15-17, 2010 Proceedings (Lecture Notes in Computer Science / Security and Cryptology)

Information and communication security must provide technological solutions to the tension between the accelerating growth of social, economical and governmental demand for digitalization of information on the one hand, and on the other, the legal and ethical obligation to protect the individuals and organizations involved. These proceedings contain the papers accepted at the 2010 International Conference on Information and Communications Security (ICICS 2010), held in Barcelona, Spain, during December 15-17, and hosted by the Information Security Group of the Universitat Politècnica de Catalunya, UPC.

ICICS2010 was the 12th event in the ICICS conference series, started in 1997, which brought together leading researchers and engineers involved in multiple disciplines of information and communications security, to foster the exchange of ideas in aspects including, but not limited to, authentication and authorization, distributed and mobile systems security, e-commerce, fraud control, intellectual property protection, operating system security, anonymity and privacy, and trusted computing.

In response to the call for papers, 135 submissions were received for this year's installment of the conference series. Each paper received at least three peer reviews on the basis of its significance, novelty, technical quality and relevance to this event. The highly competitive selection process resulted in only 31 papers being accepted, subject to a final revision before publication. ICICS 2010 was held under the sponsorship of the Spanish government and a number of private companies, particularly Scytl, which we would like to thank.
