## **Oracle Healthcare: on SOA Suite 11g EAI/ESB**

Introduction to Oracle SOA Suite for Healthcare Integration:

Oracle SOA Suite for healthcare integration utilizes several features of Oracle SOA Suite to help user or reader to design, create, and manage applications that process healthcare data. Oracle SOA Suite for healthcare integration includes a Web-based user interface where User/Reader create and configure healthcare integration applications, as well as monitor and manage the messages processed through those applications.

SOA Suite HealthCare Integration Architecture:

Oracle SOA Suite for healthcare integration provides SOA features and components that extend business processes to healthcare systems. When Oracle SOA Suite for healthcare integration is used in a SOA composite application, User/Reader model an end-to-end business process integration.

Oracle SOA Suite provides a complete set of service infrastructure components for designing, deploying and managing composite applications. The multiple technology components of a composite application share common capabilities, including a single deployment and management model and tooling, end-to-end security and unified metadata management.

In a SOA implementation, Oracle SOA Suite for healthcare integration functions as a binding component, with network protocols and services that enable message sending and receiving. As a service (inbound), the SOA composite application receives messages from Oracle SOA Suite for healthcare integration. As a reference (outbound), the SOA composite application passes a message to Oracle SOA Suite for healthcare integration, which in turn sends the message to external systems.
