Ethics and the Pharmaceutical Industry

Michael A. Santoro, Thomas M. Gorrie

Ethics and the Pharmaceutical Industry Michael A. Santoro, Thomas M. Gorrie

Despite the pharmaceutical industry's notable contributions to human progress, including the development of miracle drugs for treating cancer, AIDS, and heart disease, there is a growing tension between the industry and the public. Debates are raging over how the industry can and should be expected to act. In this volume leading figures in industry, government, NGOs, the medical community, and academia discuss and propose solutions to the ethical dilemmas of drug industry behavior. They examine such aspects as the role of intellectual property rights and patent protection, the moral and economic requisites of research and clinical trials, drug pricing, marketing and advertising. . Michael Santoro is Associate Professor with tenure in the Business Environment Department at Rutgers Business School, where he teaches courses on business ethics, public policy, labor and human rights, law, ethical issues in the pharmaceutical industry and China business strategy. As a Research Associate at Harvard Business School, he wrote or co-authored nearly thirty case studies and teaching notes on ethical and legal topics such as global protection of intellectual property, insider trading, the Federal Sentencing Guidelines and Fair Credit Reporting Act. Thomas Gorrie is Corporate Vice President, Government Affairs & Policy, at Johnson & Johnson, with responsibility for all federal, state and international government affairs and policy. He completed post-doctoral studies at the Swiss Federal Institute of Technology in Zurich, following the receipt of his doctorate at Princeton University. Gorrie has over 30 years of worldwide health care experience and has worked with various Johnson & Johnson companies in research and development, marketing and sales, business development, strategic planning, general management, international, venture capital, and health policy.
