Multimedia Database Management Systems (The Springer International Series in Engineering and Computer Science)

B. Prabhakaran

Multimedia Database Management Systems (The Springer International Series in Engineering and Computer Science) B. Prabhakaran

Multimedia Database Management Systems presents the issues and the techniques used in building multimedia database management systems.

Chapter 1 provides an overview of multimedia databases and underlines the new requirements for these applications. Chapter 2 discusses the techniques used for storing and retrieving multimedia objects. Chapter 3 presents the techniques used for generating metadata for various media objects. Chapter 4 examines the mechanisms used for storing the index information needed for accessing different media objects. Chapter 5 analyzes the approaches for modeling media objects, both their temporal and spatial characteristics. Object-oriented approach, with some additional features, has been widely used to model multimedia information. The book discusses two systems that use object-oriented models: OVID (Object Video Information Database) and *Jasmine*. The models for representing temporal and spatial requirements of media objects are then studied. The book also describes authoring techniques used for specifying temporal and spatial characteristics of multimedia databases. Chapter 6 explains different types of multimedia queries, the methodologies for processing them and the language features for describing them. The features offered by query languages such as SQL/MM (Structured Query Language for Multimedia), PICQUERY+, and Video SQL are also studied. Chapter 7 deals with the communication requirements for multimedia databases. A client accessing multimedia data over computer networks needs to identify a schedule for retrieving various media objects composing the database. The book identifies possible ways for generating a retrieval schedule. Chapter 8 ties together the techniques discussed in the previous chapters by providing a simple architecture of a distributed multimedia database management system.

Multimedia Database Management Systems can be used as a text for graduate students and researchers working in the area of multimedia databases. In addition, the book serves as essential reading material for computer professionals who are in (or moving to) the area of multimedia databases.

From reader reviews:

Gloria Duncan:

Book is definitely written, printed, or illustrated for everything. You can understand everything you want by a publication. Book has a different type. We all know that that book is important matter to bring us around the world. Adjacent to that you can your reading skill was fluently. A publication Multimedia Database Management Systems (The Springer International Series in Engineering and Computer Science) will make you to become smarter. You can feel far more confidence if you can know about almost everything. But some of you think this open or reading some sort of book make you bored. It is not make you fun. Why they might be thought like that? Have you seeking best book or ideal book with you?

Patricia Cockrell:

Book is to be different for each grade. Book for children until eventually adult are different content. To be sure that book is very important usually. The book Multimedia Database Management Systems (The Springer International Series in Engineering and Computer Science) ended up being making you to know about other information and of course you can take more information. It is extremely advantages for you. The publication Multimedia Database Management Systems (The Springer International Series in Engineering and Computer Science) is not only giving you a lot more new information but also to get your friend when you sense bored. You can spend your own personal spend time to read your publication. Try to make relationship together with the book Multimedia Database Management Systems (The Springer International Series in Engineering and Computer Science). You never sense lose out for everything should you read some books.

Michael Kautz:

Do you have something that you enjoy such as book? The reserve lovers usually prefer to choose book like comic, brief story and the biggest you are novel. Now, why not striving Multimedia Database Management Systems (The Springer International Series in Engineering and Computer Science) that give your satisfaction preference will be satisfied through reading this book. Reading habit all over the world can be said as the opportunity for people to know world a great deal better then how they react to the world. It can't be claimed constantly that reading habit only for the geeky man or woman but for all of you who wants to end up being success person. So , for every you who want to start reading through as your good habit, it is possible to pick Multimedia Database Management Systems (The Springer International Series in Engineering and Computer Science) become your current starter.

Janice Wilson:

What is your hobby? Have you heard that will question when you got learners? We believe that that concern was given by teacher on their students. Many kinds of hobby, Everybody has different hobby. So you know that little person like reading or as looking at become their hobby. You have to know that reading is very

important and book as to be the issue. Book is important thing to increase you knowledge, except your own personal teacher or lecturer. You see good news or update with regards to something by book. Many kinds of books that can you take to be your object. One of them are these claims Multimedia Database Management Systems (The Springer International Series in Engineering and Computer Science).
