An Introduction to the Dynamics of El Nino & the Southern Oscillation Allan J. Clarke

Many scientists either working on the El Niño/Southern Oscillation (ENSO) problem or its many applications have not been trained in both the equatorial ocean and atmospheric dynamics necessary to understand it. This book seeks to overcome this difficulty by providing a step by step introduction to ENSO, helping the upper level graduate student or research scientist to learn quickly the ENSO basics and be up to date with the latest ENSO research. The text assumes that the reader has a knowledge of the equations of fluid mechanics on a rotating earth and emphasizes the observations and simple physical explanations of them.

Following a history of ENSO and a discussion of ENSO observations in Chapters 1 and 2, Chapters 3-5 consider relevant equatorial ocean dynamics, Chapters 6 and 9 relevant atmospheric dynamics, and Chapters 7 and 8 the main paradigms for how the Pacific Ocean and atmosphere couple together to produce ENSO. Chapter 8 also discusses the old mystery of why ENSO tends to be locked in phase with the seasonal cycle. Successful dynamical and statistical approaches to ENSO prediction are discussed in Chapters 10 and 11 while Chapter 12 concludes the book with examples of how ENSO influences marine and bird life.

- * Quick reference guide and step by step introduction to El Niño/Southern Oscillation dynamics
- * Keep informed and up to date on El Niño/Southern Oscillation research and how El Niño and the Southern Oscillation can be predicted
- * Understand how El Niño can affect marine and bird life

From reader reviews:

Anne Larsen:

Book will be written, printed, or descriptive for everything. You can recognize everything you want by a book. Book has a different type. As it is known to us that book is important matter to bring us around the world. Adjacent to that you can your reading proficiency was fluently. A publication An Introduction to the Dynamics of El Nino & the Southern Oscillation will make you to be smarter. You can feel far more confidence if you can know about anything. But some of you think that open or reading a book make you bored. It isn't make you fun. Why they can be thought like that? Have you looking for best book or appropriate book with you?

Ruth Brown:

The book untitled An Introduction to the Dynamics of El Nino & the Southern Oscillation contain a lot of information on it. The writer explains your girlfriend idea with easy approach. The language is very simple to implement all the people, so do not worry, you can easy to read the idea. The book was compiled by famous author. The author will bring you in the new period of literary works. If you want to buy the e-book, you can available their official web-site along with order it. Have a nice examine.

Sandra Vincent:

Beside this specific An Introduction to the Dynamics of El Nino & the Southern Oscillation in your phone, it can give you a way to get more close to the new knowledge or data. The information and the knowledge you will got here is fresh from your oven so don't become worry if you feel like an outdated people live in narrow community. It is good thing to have An Introduction to the Dynamics of El Nino & the Southern Oscillation because this book offers to you readable information. Do you oftentimes have book but you don't get what it's about. Oh come on, that would not happen if you have this with your hand. The Enjoyable set up here cannot be questionable, including treasuring beautiful island. So do you still want to miss the idea? Find this book along with read it from currently!

Wendy Kroll:

That reserve can make you to feel relax. This book An Introduction to the Dynamics of El Nino & the Southern Oscillation was vibrant and of course has pictures on there. As we know that book An Introduction to the Dynamics of El Nino & the Southern Oscillation has many kinds or variety. Start from kids until youngsters. For example Naruto or Detective Conan you can read and believe you are the character on there. Therefore , not at all of book are make you bored, any it offers you feel happy, fun and relax. Try to choose the best book for you and try to like reading that.
