You Are My World: How a Parent's Love Shapes a Baby's Mind Amy Hatkoff

Together, the pictures and words of *You Are My World* lend a whole new meaning to the phrase “baby talk.” By pairing lovely black-and-white photographs of infants with captions that reflect reality as seen through their newborn eyes, the book celebrates the continually miraculous interaction that occurs between babies and the most significant people in their young lives—their mothers and fathers.

Children’s minds are molded by experience, and science tells us that the way a parent touches, holds, looks at, and responds to a baby has a lifelong impact on the way that this brand-new person will come to see the world and his or her place within it. *You Are My World* gratefully acknowledges the profoundly shaping influence that a parent’s love and attention have on a baby’s mental and emotional development.

“Your love is my first teacher,” says one of the adorable infants portrayed here. Like each of the book’s captions, this simple but poetic statement captures and illuminates every baby’s desire for, receptivity to, and sheer delight in a parent’s love. Featuring a die-cut frame in which parents can place a photo of their own child, *You Are My World* will become a treasured family keepsake.

"You Are My World ... evokes the powerful reality of how the parent-infant relationship sculpts the minds and brains of our children. Amy Hatkoff has offered us an exquisite tour of the intimate human connections ... from which our deepest sense of self emerges. What a wonder-filled gift to help all parents ... Bravo!"

"You Are My World captures the subtle nonverbal behaviors of babies that express a far wider range of emotional experience than is often recognized or responded to. The photographs ... convey the power and importance of nonverbal communication and bring us closer to the best in humans and in ourselves."

" This book is a treasure. It is a wonderful, concise treatise on the abilities of the newborn. It supercedes Ashley Montague and Frederick LeBoyer and their approach. It brings you right into the heart of the newborn, giving them a strong and clear voice of what it takes to become the 'possible human.' A remarkable, beautiful piece of work."

It is a spoonful of sugar helping state-of-the-science knowledge go down ever so smoothly, energizing grown-ups for the good responsive care that all little ones need."
