## Law in the Pursuit of Development: Principles into Practice? (Law Development and Globalization)

*Law in the Pursuit of Development* critically explores the relationships between contemporary principles and practice in law and development. Including papers by internationally renowned, as well as emerging, scholars and practitioners, the book is organised around the three liberal principles which underlie current efforts to direct law towards the pursuit of development. First, that the private sector has an important role to play in promoting the public interest; second, that widespread participation and accountability are essential to any large scale enterprise; and third, that the rule of law is a fundamental building block of development.

This insightful and provocative collection, in which contributors critique both the principles and efforts to implement them in practice, will be of considerable interest to students, academics and practitioners with an interest in the fields of law and development, international economic law, and law and globalization.
